

Bringing the aircraft and the pilot out of moth balls.

This event will focus on safety issues encountered when an aircraft is pulled out of the hanger after an extended period of time. We can't just jump in and go! The session will also address the pilots currency, are we a bit "rusty" flying this plane after winter storage? Questions and answers regarding this familiar scenario will be entertained.

Directions: From Interstate 29 take exit 69 East. Travel 2 miles East to 20th Street North. While entering the complex turn right, (West). Event is in the second floor of last hanger to the West.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
